

STATEMENT OF PURPOSE

RS19203

This proposal amends Idaho Code section 49-509, to bring the process required in Idaho Code for reporting and tracking stolen vehicles current to practices with today's technology.

Idaho Code section 49-509 prescribes a process for law enforcement officers to report stolen vehicle information to the Idaho State Police (ISP), and for the ISP to aggregate this information and report it back to all law enforcement agencies and the Idaho transportation department. The process described is outdated, requiring publication of lists and reports. Current practice utilizes the technology of the ILETS/NCIC system available to and used by all law enforcement agencies for a number of purposes.

FISCAL NOTE

There is no fiscal impact to this proposal. The practice of entering data in the ILETS/NCIC system and receiving information from that system is already in practice by all Idaho law enforcement agencies.
